

Corporate consolidation of media has already gotten completely out of hand. Where an informed public could benefit from a multitude of voices in the media, the trend is obviously toward only one voice being heard. Because of the dangers of corporate media ownership and consolidation, Docket - 02-277 should be voted down and further steps should be taken to reverse the recent trend toward media deregulation and the harm it has caused the public.

At the very least, this issue should be open for public and congressional discussion and postponing the vote seems far from reasonable. I respectfully request the same.
